Recommended Sequencing Plan

Shown below is a sample sequence of courses for your certificate or diploma. If you follow this plan, you should be able to graduate in one or two years, provided you complete ten courses per academic year (up to three semesters per year). The sequence below is one example of how you could complete your core and elective requirements; you may find that a different sequence works as well, though it's important to note that some courses are offered only in Fall or Winter while others are available in both or more (see the "Usual Term" column in the program plan on the previous page). You may complete the courses over two or four semesters, and you may take them in any order you like provided you have met any prerequisites.

PREPARATORY COURSES

MATH 105 requires Math 11 (or Yukon University MATH 050). Math 12 and/or Yukon University MATH 130 are highly recommended preparation.
